FACTORS	RESEARCH	COMPARISON WITH OTHERS	WORKING CONDITION OF THE APP	QUESTIONING	SIGN-OUT
Practical Q/A 's	<ul> <li>How can I Build the app?</li> <li>What are the technologies that I need to use?</li> <li>What will be the approximate budget for the app?</li> <li>Will it take more time?</li> </ul>	<ul> <li>With whom, they have worked before?</li> <li>What abilities do the developers have?</li> <li>What is the estimated cost and quality of the app?</li> </ul>	Based on what measures, I can say that app will be working well?      Who will be the owner of the product after installation?	How will I fund this?      Do I really need to workout on this feature?      What are the other opportunities I have?	When will the final product be delivered  What are the other factors required to setup the project?
Emotions /Feelings/ Mindset	Enthusiastic     Curious     Confident in building     Protecting from third party     Self-esteem	Subjective     Doubt     Look on Pros and Cons     Le. based on money     and quality	Eager to use the app Inspired, that app will resolve their disability issues. Increased Motivation	Discuss with the team     Revisit the ideas.     Understand the Customer's point of view.	Nervous     Little bit     Confident     Anxious to     see the     results.
We need to	Convey them that we have built the app Provide confidence by getting back to us.	Step by step procedure about the usage is explained Build trust on us. Being genuine and open.	Convey, this app is entire team's effort.     For any Queries, we are there to guide you.     Don't worry about the features of the phone.	Provide trust in them by claiming the one of the best teams.     Open to answer their concerned questions.	Ask for feedback?     Guide them throughout the project.     inform them about the updation in succeding days.
